Candles and Open Flames

1. You may use sterno in chafing dishes with constant supervision.

Thumbtacks are permitted only on bare sections of walls. No confetti or rice anywhere on the property, inside or out. (Birdseed is permitted.)

Fans

1. The overhead fans are sometimes necessary in the summer. They are controlled by a labeled switch in the lower level kitchen between the refrigerator and the side door.
2. Don't let escaped balloons tangle in the fans.

Fields

1. Our fields are not lawns. They are uneven and may have occasional critter holes. We try to keep our fields clear and mowed, but there may be branches or other natural debris in them. Be cautious when walking and definitely while running in them.
2. There should absolutely be no entrance to areas surrounded by wooden fences.
3. During the wet months, do NOT drive any vehicles onto the fields. You will rut up the fields and probably get stuck. During the wet months don't even attempt to drive around the building to access the Lower Level of the building.
